Keywords Documentation of Buy Page Resource:

Keywords	Arguments	Documentation
Click on Home Icon and Select 'Buy' From Main Menu		Call this keyword to click on 'Buy' from Home menu. **Expected behavior**: Navigate to Buy dashboard.
Verify Page Title		Verifies whether the actual page title of Buy module matches with expected page title.
Verify The Buy Dashboard Tab Is Available		Checks if the 'Buy Dashboard' tab is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Country Groups link is Available		Checks if 'Country Groups' link is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Re-Analysis link is Available		Checks if 'Re-Analysis' link is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Vendors Tab Is Available		Checks if 'Vendors' tab is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Click On Vendors Tab		Call this keyword to click on 'Vendors' tab. **Expected behavior**: Navigate to Vendors tab
Verify The 'Create Vendor' Button Is Present Under Vendors Tab		Checks if 'Create Vendor' button is present or not in Vendors tab. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The 'Vendor Price Lists' Button Is Present Under Vendors Tab		Checks if 'Vendor Price Lists' button is present or not in Vendors tab. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Click On Inline Action Button	Vendor Name	Call this keyword to click on Inline Action Button of Vendors grid. **Expected behavior**: Inline action dropdown should be shown.

		Example: Verify Click On Inline Action Button UAT_AUTO_NEW_VENDOR
Verify Vendor Profile is Available		Checks if 'Vendor Profile' inline action item is present or not in Vendors grid. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Vendor Rates is Available		Checks if 'Vendor Rates' inline action item is present or not in Vendors grid. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Vendor Digits is Available		Checks if 'Vendor Digits' inline action item is present or not in Vendors grid. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Vendor Destination is Available		Checks if 'Vendor Destination' inline action item is present or not in Vendors grid. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Upload Vendor Price List is Available		Checks if 'Upload Vendor Price List' inline action item is present or not in Vendors grid. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Select Vendor Profile Inline Action Item		Call this keyword to click on 'Vendor Profile' inline action item in Vendors grid. **Expected behavior**: Vendor profile inline action item should be clicked and vendor profile tab should be opened.
Verify Click On Rates Tab	Rates Tab Name	Call this keyword to select 'Rates' tab under vendor profile tab. **Expected behavior**: Rates tab should get selected.
Verify Select Inline Action Item	Inline Item Name	Call this keyword to click on any inline action item. **Example**:

		Verify Select Inline Action Item Vendor Profile
Verify Vendor Profile Page is Loaded Properly		Checks if Vendor Profile page is loaded properly. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Click On Dial Digits Tab	Dial Digits Tab Name	Call this keyword to select 'Dial Digits' tab under vendor profile tab. **Expected behavior**: Dial Digits tab should get selected.
Verify Click On Destinations Tab	Destination Tab Name	Call this keyword to select 'Destinations' tab under vendor profile tab. **Expected behavior**: Destinations tab should get selected.
Verify Click On Vendor Price Lists		Call this keyword to click 'Vendor Price Lists' button under vendors tab. **Expected behavior**: Vendor Price Lists tab should be opened.
Verify Set From Date	From Date	Sets date in 'From Date' input box. **Example:** Verify Set From Date 1/1/2018
Verify Set To Date		Sets date in 'To Date' input box. Does not take any input, sets current date as 'To Date' by default.
Verify Click On Vendor Price Lists Search Button		Call this keyword to click 'Search' button under vendor price lists tab. **Expected behavior**: Shows search results in Vendor Price Lists grid.

Verify Click On View Price List Detail Inline Action Button	Price List Item Name	Call this keyword to click on Inline Action Button of Vendor Price List Details grid. **Expected behavior**: Inline action dropdown should be shown. **Example**: Verify Click On View Price List Detail Inline Action Button UAT_AUTO_PRICE_LIST
Verify View Price List Detail Inline Action Item		Call this keyword to select 'Vendor Price List Detail' inline action item in Vendor Price Lists grid. **Expected behavior**: Vendor price lists detail inline action item should be clicked and vendor price list detail tab should be opened.
Verify Set Price List Item	Dropdown Item	Selects single item from 'Price List' single selection dropdown **Example**: Verify Set Price List Item UAT_AUTO_PRICE_LIST
Verify Search Results Displayed In The Grid		Checks whether results are shown in the grid or the grid is empty. Returns 'TRUE' if grid has any data and 'FALSE' otherwise.
Verify Click On Create Vendor Button		Call this keyword to click 'Create Vendor' button in Vendors grid. **Expected behavior**: Create Vendor should be opened in a separate tab.
Verify Set Vendor Name	Vendor Name Prefix	Sets vendor name in 'Vendor Name' textbox. Adds random string along with the prefix then sets the final value in the textbox. **Example**: Verify Set Vendor Name UAT_AUTO

Verify Set Vendor Source	Abbreviation Prefix	Sets abbreviation in 'Abbreviation' textbox. Adds random string along with the prefix then sets the final value in the textbox. **Example**: Verify Set Vendor Source UAT_AUTO
Verify Set Ixtools Account		Sets iXTools Account in 'iXTools Account' single selection dropdown. By default sets the Carrier created from carrier module.
Verify Set Rate Plan		Sets rate plan in 'Rate Plan' single selection dropdown. By default sets the Rate Plan created from carrier module.
Verify Set Call Type	Call Type Dropdown Item	Sets call type in 'Call Type' single selection dropdown. **Example**: Verify Set Call Type ISDN
Verify Set Vendor Profile Status	Vendor Profile Status Dropdown Item	Sets status in 'Status' single selection dropdown in Create Vendor screen. **Example**: Verify Set Status Active
Verify Click On Save Vendor Profile Button		Call this keyword to click 'Save Vendor Profile' button and verify success message and then to click 'Ok' button. **Expected behavior**: Saves the newly created vendor successfully.
Verify Close Create Vendor Tab	Tab Name To Close	Call this keyword to close 'Create Vendor' tab. **Example**: Verify Close Create Vendor Tab Vendor
Verify Close Vendor Profile Tab	Tab Name To Close	Call this keyword to close 'Vendor Profile' tab.

		Example: Verify Close Vendor Profile Tab Vendor Profile
Verify Filter Vendor Grid Column	Column Name to Filter, Filer Item List (list)	Applies filter to Vendors grid column. Takes column name and list of item to filter and filters the grid accordingly. **Example**: Verify Filter Vendor Grid Column Vendor UAT_AUTO_NEW_VENDOR
Verify Filter Price List Grid Column	Column Name to Filter, Filer Item List (list)	Applies filter to Vendor Price List grid column. Takes column name and list of item to filter and filters the grid accordingly. **Example**: Verify Filter Price List Grid Column Price List Price_list_name
Verify Clear Status Filter	Column Name to Clear Filter	Clears the column filter from the grid if that column is already filtered. **Example**: Verify Clear Status Filter Status
Verify Clear Vendor Filter	Column Name to Clear Filter	Clears the column filter from the grid if that column is already filtered. **Example**: Verify Clear Status Filter Status
Verify Filter Status Grid Column	Column Name to Filter, Filer Item List (list)	Applies filter to grid column. Takes column name and list of item to filter and filters the grid accordingly. **Example**: Verify Filter Status Grid Column Status Active
Verify Grid Row Data	Grid Status, Vendor Name	Verifies whether grid row data matches with the created vendor data in Vendor grid.

		Example: Verify Filter Status Grid Column Active UAT_AUTO_NEW_VENDOR
Verify Grid Row Data With Active Status	Vendor Name, Active Status	Verifies whether grid row data matches with the created vendor data in Vendor grid, when the status is 'Active'. **Example**: Verify Filter Status Grid Column Active UAT_AUTO_NEW_VENDOR
Verify Clear All Table Filters	Column Name to Clear All Table Filters	Selects 'Clear All Table Filters' option from specific column of a grid. **Example**: Verify Clear All Table Filters Vendor
Verify Get First Row Vendor Name From Price List Grid	Column Name	Returns the first row vendor name form Vendor Price Lists grid.
Verify View Price List Detail Is Present		Checks if 'View Price List Detail' inline action item is present or not in Vendors Price Lists grid. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Analyze and Complete Is Present		Checks if 'Analyze and Complete' inline action item is present or not in Vendors Price Lists grid. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Selected Vendor Name	Selected Vendor Name	Verifies whether the vendor that has been selected is appearing properly in the UI. **Example**: Verify Selected Vendor Name UAT_AUTO_NEW_VENDOR
Verify Selected Price List Item	Selected Price List	Verifies whether the Price list that has been selected is appearing properly in the UI.

		Example: Verify Selected Price List Item PRICE_LIST_NAME
Verify Select Rates Tab of View Price List Detail	Rates Tab Name	Call this keyword to select 'Rates' tab under price list detail screen. **Expected behavior**: Rates tab should get selected.
Verify Select Dial Digits Tab of View Price List Detail	Dial Digits Tab Name	Call this keyword to select 'Dial Digits' tab under price list detail screen. **Expected behavior**: Dial Digits' tab should get selected.
Verify Select Reference Rates Tab of View Price List Detail	Reference Rates Tab Name	Call this keyword to select 'Reference Rates' tab under price list detail screen. **Expected behavior**: Reference Rates tab should get selected.
Verify Rates Tab Is Loaded Properly		Checks if 'Rates Tab' is present or not in Vendors Price List Detail screen. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Dial Digits Tab Is Loaded Properly		Checks if 'Dial Digits Tab' is present or not in Vendors Price List Detail screen. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Reference Rates Tab Is Loaded Properly		Checks if 'Reference Rates Tab' is present or not in Vendors Price List Detail screen. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Select Vendor Price List Grid Row Checkbox		Selects checkboxes of the first two rows from Vendor Price Lists grid.
Verify Set Vendor Price List Status	Status Item List (list)	Sets status in 'Status' multiple selection dropdown in Vendor Price Lists screen.

		Example: Verify Set Status @{STATUS LIST}
Verify Click Compare Price Lists Button		Call this keyword to click 'Compare Price Lists' button **Expected behavior**: Compare Price List pop up should be opened.
Verify Click On Analyze And Complete Inline Action		Call this keyword to select 'Analyze and Complete' inline action item in Vendor Price Lists grid. **Expected behavior**: Selected vendor price list should be analyzed and get completed.
Verify Selected Price Lists Details Info		Verifies whether the details of the selected price list matches with expected details or not.
Verify Rates Grid Columns Header		Checks if Rates grid column headers match with expected headers or not. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Select Dial Digits Tab		Call this keyword to select 'Dial Digits' tab under vendor profile screen. **Expected behavior**: Dial Digits tab should get selected.
Verify Dialed Digits Columns Header		Checks if Dial Digits grid column headers match with expected headers or not. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Close Compare Price Lists Pop Up		Closes 'Compare Price Lists' pop up.
Verify Select Upload Vendor Price List Inline Action Button	Upload Vendor Price List Inline Item	Call this keyword to select 'Upload Vendor Price List' inline action item in Vendors grid. **Expected behavior**: Upload vendor price lists pop up should be opened.

		Example: Verify Select Upload Vendor Price List Inline Action Button Upload Vendor Price List
Verify Click On Browse Button		Call this keyword to click 'Browse' button in Upload vendor price list pop up. **Expected behavior**: File browsing window should be opened.
Verify Select The File To Be Uploaded	Vendor Price List File Path	Selects the file to be uploaded from specific location. **Example:** Verify Select The File To Be Uploaded C:/Templates/VendorPriceList.xls
Verify Click On Upload Button		Call this keyword to click 'Upload' button in Upload vendor price list pop up. **Expected behavior**: Selected file should be uploaded.
Verify Click On Vendor Price List Upload Colored Icon		Call this keyword to click the colored icon in top right corner of the UI in Vendor Price Lists screen. **Expected behavior**: Jobs tab should be opened.
Verify Click On Vendor Price List Upload Search Button		Call this keyword to click 'Search' button in vendor price lists upload screen. **Expected behavior**: Search results should be populated in the grid.
Verify Set From Date As Current Date		Sets current date as from date in 'From Date' input box. **Example:** Verify Set From Date As Current Date

Verify Close Job Tab	Job Tab Name	Closes 'Jobs' tab. **Example:** Verify Close Job Tab Jobs
Verify Filter Vendor Grid Column For Upload Vendor Price List	Column Name to Filter, Filer Item List (list)	Applies filter to grid column. Takes column name and list of item to filter and filters the grid accordingly. **Example**: Verify Filter Status Grid Column Status Active
Verify Get Vendor Price Lists Number Of Rows From Grid		Stores the number of rows in Vendor Price Lists grid.
Verify Compare Vendor Price Lists Number Of Rows From Grid		Compares the number of rows in Vendor Price Lists grid whether it matches with the previously stored number of rows or not. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Close Vendor Price Lists Tab	Vendor Price Lists Tab Name	Closes 'Vendor Price Lists' tab. **Example:** Verify Close Job Tab Vendor Price Lists
Verify Vendor Price Lists Grid Details	Vendor Name	Verifies whether Vendor Price Lists grid row details matches with the given values. **Example:** Verify Vendor Price Lists Grid Details UAT_AUTO_NEW_VENDOR
Verify Get Vendor Price Lists Details		Stores values of different column in Vendor Price Lists grid.
Verify Uploaded Vendor Price List details on Database		Verifies whether Vendor Price Lists grid row details matches with database values or not.

Verify Click On Inline Action Button For Upload Price List	Upload Price List Vendor Name	Call this keyword to click Inline Action button in Vendors grid for Uploading Price List. **Expected behavior**: Inline action items should be shown. **Example:** Verify Click On Inline Action Button For Upload Price List UAT_AUTO_NEW_VENDOR
Verify Click On View Price List Detail Inline Action Button For Analyze And Complete	Price List Item for Analyze And Complete	Call this keyword to click Inline Action button in Vendor Price List Detail grid for Analyze and Complete **Expected behavior**: Inline action items should be shown. **Example:** Verify Click On View Price List Detail Inline Action Button For Analyze And Complete Price List Name
Verify Click On Inline Action Button After Create	Vendor Name	Call this keyword to click Inline Action button in Vendors grid after creating new vendor. **Expected behavior**: Inline action items should be shown. **Example:** Verify Click On Inline Action Button After Create UAT_AUTO_NEW_VENDOR
Verify Filter Vendor Grid Column After Create	Column Name to Filter, Vendor Name	Applies filter to Vendors grid Vendor column after creating new vendor. Takes column name and vendor name to filter. **Example**: Verify Filter Status Grid Column Vendor UAT_AUTO_NEW_VENDOR
Verify Grid Row Details	Grid Status, Vendor Name	Verifies whether Vendors grid row details matches with the given values.

		Example:
		Verify Vendor Price Lists Grid Details Active UAT_AUTO_NEW_VENDOR
Verify Click View Price List Detail First Row Inline Action Button		Call this keyword to click Inline Action button of the first row in Vendor Price List Detail grid. **Expected behavior**: Inline action items should be shown.
Verify Get First Row Price List Name From Price List Grid	Column Name	Returns first row Price List name from Vendor Price Lists grid. **Example:** Verify Get First Row Price List Name From Price List Grid Price Lists
Verify Check Has Network Code Checkbox		Checks if 'Has Network Code' checkbox is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Read Data From Upload Excel File	Upload File Path	Stores data from the excel file to be uploaded. **Example:** Verify Read Data From Upload Excel File C;/Templates/VendorPriceListTemplate.xls
Verify Compare Dialed Digit With Excel Data		Compares Dial Digits grid values with the uploaded excel file data. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Compare Rates With Excel Data		Compares Rates grid values with the uploaded excel file data. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Compare Destination With Excel Data		Compares Destination grid values with the uploaded excel file data. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Set Rate Catalog	Rate Catalog	Sets rate catalog in 'Rate Catalog' single selection dropdown.

		Example: Verify Set Rate Catalog Vendor Rates
Verify Set Buy Module Begin Date	Begin Date	Sets begin date in 'Begin Date' date picker input box. **Example:** Verify Set Buy Module Begin Date 1/1/2018
Verify Click Buy Module Search Button		Call this keyword to click 'Search' button in buy module. **Expected behavior**: Search results should be displayed.
Verify Click Vendor Price List Upload Failed Red Icon		Call this keyword to click the red colored icon in top right corner of the UI in Vendor Price Lists screen. **Expected behavior**: Jobs tab should be opened with 'Failed' status selected.
Verify Get Jobs Grid Initial Row Count		Stores the number of rows in Jobs grid.
Verify Compare Jobs Grid Number Of Rows		Compares the number of rows from Jobs grid with previously stored row count.
Verify Sort Reg Time Column In Descending Order		Sorts the 'Reg Time' column in Jobs grid in descending order.
Verify Click Error Icon		Call this keyword to click the 'Error' icon in Jobs grid. **Expected behavior**: Error information should be shown.
Verify Close Current Pop Up	Pop Up Name	Closes the current pop up shown in the UI.

		Example:
		Verify Close Current Pop Up Upload Vendor Price List
Verify Non Numeric Dd Invalid Message Shown		Checks if 'Non Numeric DD' invalid message is shown or not. Returns 'TRUE' if shown and 'FALSE' otherwise.
Verify Has Network Code Unchecked		Checks if 'Has Network Code' checkbox is unchecked or not. Returns 'TRUE' if unchecked and 'FALSE' otherwise.
Verify Close Buy Window		Closes 'Buy' window and switches to previous window.
Verify Grid Filter Details	Column Name to Filter, Filer Item List (list)	Applies filter to grid column. Takes column name and list of item to filter and filters the grid accordingly.

Example:
Verify Filter Status Grid Column   Status Active |
| Verify Click Buy Page Inline Action Button | Row Identifier Text | Call this keyword to click Inline Action Button in buy page.

Example:
Verify Click Buy Page Inline Action Button UAT_AUTO_NEW_VENDOR |
| Verify Select Buy Page Inline Action Item | Inline Action Item | Call this keyword to select Inline Action Item in buy page.

Example:
Verify Select Buy Page Inline Action Item Vendor Profile |
| Verify Get Created Vendor Name | | Returns latest created 'Vendor Name' |

Verify Click Vendors Grid First Row Inline Action Button		Call this keyword to click Inline Action Button of the first row in Vendors Grid.
Verify Rates Page Loaded Properly		Checks if 'Rates' page is loaded properly or not. Returns 'TRUE' if loaded properly and 'FALSE' otherwise.
Verify Dialed Digits Page Loaded Properly		Checks if 'Dial Digits' page is loaded properly or not. Returns 'TRUE' if loaded properly and 'FALSE' otherwise.
Verify Destinations Page Loaded Properly		Checks if 'Destinations' page is loaded properly or not. Returns 'TRUE' if loaded properly and 'FALSE' otherwise.
Verify Upload Vendor Price List Pop Up Is Available		Checks if 'Upload Vendor Price List' pop up is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Close Current Tab	Tab Name	Closes the current tab according to Tab Name parameter.
Verify Select Vendor Page Inline Action Item	Inline Item Name	Call this keyword to select Inline Action Item in vendor page. **Example**: Verify Select Vendor Page Inline Action Item Vendor Profile
Verify Click Vendor Price List Grid First Row Inline Action Button		Call this keyword to click the first row Inline Action Button in Vendor Price Lists Grid.
Verify Click Export To Excel Button		Call this keyword to click 'Export to Excel' button in Vendor Price Lists screen. **Expected behavior**: An excel file should be downloaded.
Verify Vendor Grid Carrier	Carrier Name	Compares Vendors grid carrier with the give carrier name whether they match or not.

		Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Vendor Grid Carrier Vendor Profile
Verify Last Price List Date Format	Expected Date Format	Verifies whether the 'Last Price Date' date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Last Price List Date Format %m/%d/%Y
Verify Vendors Grid Cost Currency Format	Locale For Currency Format	Verifies whether the 'Cost' column currency format from Vendors grids matches with the expected currency format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Vendors Grid Cost Currency Format en
Verify Get Previous Created Vendor Name		Returns previously created 'Vendor Name'
Verify Set Vendors	Vendor Name	Set vendors in 'Vendors' multiple selection dropdown. **Example**: Verify Set Vendors UAT_AUTO_VENDOR
Verify Set Rates Destination		Set Rates tab destination. Rates value achieved from excel file is set by default.
Verify Vendors Grid Margin Format	Locale For Currency Format	Verifies whether the 'Margin' column currency format from Vendors grid matches with the expected currency format or not. Returns 'TRUE' if matches and 'FALSE' otherwise.

		Example: Verify Vendors Grid Margin Format en
Verify Last Modified Date Format	Expected Time Stamp Format	Verifies whether the 'Last Modified Date' time stamp format matches with the expected time stamp format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Last Price List Date Format %m/%d/%Y
Verify Select Rates Tab		Call this keyword to select 'Rates' tab. **Expected behavior**: Rates tab should be selected.
Verify Begin Date Input Field Value Format	Expected Date Format	Verifies whether the 'Begin Date' input filed date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Begin Date Input Field Value Format %m/%d/%Y
Verify Rates Grid Begin Date Format	Expected Date Format	Verifies whether the Rates grid 'Begin Date' column date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Rates Grid Begin Date Format %m/%d/%Y
Verify Rates Grid Last Modified Date Format	Expected Date Format	Verifies whether the Rates grid 'Last Modified Date' column date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise.

		Example: Verify Rates Grid Last Modified Date Format %m/%d/%Y
Verify Select Dialed Digits Tab		Call this keyword to select 'Dial Digits' tab. **Expected behavior**: Dial Digits tab should be selected.
Verify Dialed Digits Grid Begin Date Format	Expected Date Format	Verifies whether the Dialed Digits grid 'Begin Date' column date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Dialed Digits Grid Begin Date Format %m/%d/%Y
Verify Dialed Digits Last Modified Date Format	Expected Date Format	Verifies whether the Dialed Digits grid 'Last Modified Date' column date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Dialed Digits Last Modified Date Format %m/%d/%Y
Verify Select Destinations Tab		Call this keyword to select 'Destinations' tab. **Expected behavior**: Destinations tab should be selected.
Verify Destinations Grid Begin Date Format	Expected Date Format	Verifies whether the Destinations grid 'Begin Date' column date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Destinations Grid Begin Date Format %m/%d/%Y

Verify Destinations Grid Last Modified Date Format	Expected Date Format	Verifies whether the Destinations grid 'Last Modified Date' column date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Destinations Grid Last Modified Date Format %m/%d/%Y
Verify Select Vendors Tab		Call this keyword to select 'Vendors' tab. **Expected behavior**: Vendors tab should be selected.
Verify Vendor Price List Date Format		Verifies whether the 'Vendor Price List Date' date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Vendor Price List Date Format %m/%d/%Y
Verify Click Upload Cancel Button		Call this keyword to click 'Cancel' button in Upload Vendor Price List pop up. **Expected behavior**: Upload should be canceled and pop up should be closed.
Verify Vendor Price List From Date Format		Verifies whether the Vendor Price List screen 'From Date' date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Vendor Price List From Date Format %m/%d/%Y
Verify Vendor Price List To Date Format		Verifies whether the Vendor Price List screen 'To Date' date format matches with the expected

		date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Vendor Price List To Date Format %m/%d/%Y
Verify Price List Date Column Value Format		Verifies whether the Vendor Price Lists grid 'Date' column date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Price List Date Column Value Format %m/%d/%Y
Verify Price List Modified Date Column Value Format		Verifies whether the Vendor Price Lists grid 'Modified Date' column date format matches with the expected date format or not. Returns 'TRUE' if matches and 'FALSE' otherwise. **Example**: Verify Price List Modified Date Column Value Format %m/%d/%Y
Verify Select Buy Dashboard		Call this keyword to select 'Buy Dashboard' tab. **Expected behavior**: Buy Dashboard tab should be selected.
Verify Click Country Group		Call this keyword to click 'Country Group' button. **Expected behavior**: Country group tab should be opened.
Verify Country Groups Grid Last Modified Date Column Value Format	Expected Time Stamp Format	Verifies whether the Country Groups grid 'Last Modified Date' column time stamp format matches with the expected time stamp format or not. Returns 'TRUE' if matches and 'FALSE' otherwise.

			Example: Verify Country Groups Grid Last Modified Date Column Value Format %m/%d/%Y
Verify Ascending Sorted Data	List of Data (list)		Verifies whether the ascending sort is working properly or not. Example: Verify Ascending Sorted Data @{ALL ROW DATA}
Verify Descending Sorted Data	List of Data (list)		Verifies whether the descending sort is working properly or not. Example: Verify Ascending Sorted Data @{ALL ROW DATA}
Verify Grid Column Position After Altering	Source Column Name, Destination Column Name, Column Name List (list)		Checks if grid column position is altered after drag and drop operation on grid columns. Example: Verify Grid Column Position After Altering Country Group Countries @{COLUMN NAME LIST}
Verify Set Vendors Grid Settings	Grid Settings		Set Vendors grid setting from Grid Settings dropdown. Expected Behavior: Grid should be changed according to grid settings Example: Verify Set Vendors Grid Settings Reset All
Verify Get All Rows of Specific Column From Vendors Grid	Column Name		Returns data of all the rows of given column name from Vendors grid. Example: Verify Get All Rows of Specific Column From Vendors Grid Vendor

Verify Sort Vendors Grid Column In Ascending Order	Column Name	Sorts Vendors grid specific column in ascending order. **Example**: Verify Sort Vendors Grid Column In Ascending Order Vendor
Verify Sort Vendors Grid Column In Descending Order	Column Name	Sorts Vendors grid specific column in descending order. **Example**: Verify Sort Vendors Grid Column In Descending Order Vendor
Verify Get Vendors Grid Column Names By Order		Returns all the column names of Vendors grid in order.
Verify Drag Vendors Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Vendors grid. **Example**: Verify Drag Vendors Grid Column Vendor Status
Verify Set Vendor Price Lists Grid Settings	Grid Settings	Set Vendor Price Lists grid settings from Grid Settings dropdown. **Expected Behavior:** Grid should be changed according to grid settings **Example**: Verify Set Vendor Price Lists Grid Settings Reset All
Verify Get All Rows of Specific Column From Vendor Price Lists Grid	Column Name	Returns data of all the rows for given column name from Vendor Price Lists grid. **Example**: Verify Get All Rows of Specific Column From Vendor Price Lists Grid Vendor

Verify Sort Vendor Price Lists Grid Column In Ascending Order	Column Name	Sorts Vendor Price Lists grid specific column in ascending order. **Example**: Verify Sort Vendor Price Lists Grid Column In Ascending Order Vendor
Verify Sort Vendor Price Lists Grid Column In Descending Order	Column Name	Sorts Vendor Price Lists grid specific column in descending order. **Example**: Verify Sort Vendor Price Lists Grid Column In Descending Order Vendor
Verify Get Vendor Price Lists Grid Column Names By Order		Returns all the column names of Vendor Price Lists grid in order.
Verify Drag Vendor Price Lists Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Vendor Price Lists grid. **Example**: Verify Drag Vendor Price Lists Grid Column Vendor Status
Verify Get All Rows of Specific Column From Rates Grid	Column Name	Returns data of all the rows for given column name from Rates grid. **Example**: Verify Get All Rows of Specific Column From Rates Grid Rating Product
Verify Sort Rates Grid Column In Ascending Order	Column Name	Sorts Rates grid specific column in ascending order. **Example**: Verify Sort Rates Grid Column In Ascending Order Rating Product
Verify Sort Rates Grid Column In Descending Order	Column Name	Sorts Rates grid specific column in descending order.

		Example: Verify Sort Rates Grid Column In Descending Order Rating Product
Verify Get Rates Grid Column Names By Order		Returns all the column names of Rates grid in order.
Verify Drag Rates Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Rates grid. **Example**: Verify Drag Rates Grid Column Rating Product Status
Verify Get All Rows of Specific Column From Destinations Grid	Column Name	Returns data of all the rows for given column name from Destination grid. **Example**: Verify Get All Rows of Specific Column From Destinations Grid Destination
Verify Sort Destinations Grid Column In Ascending Order	Column Name	Sorts Destinations grid specific column in ascending order. **Example**: Verify Sort Destinations Grid Column In Ascending Order Destination
Verify Sort Destinations Grid Column In Descending Order	Column Name	Sorts Destinations grid specific column in descending order. **Example**: Verify Sort Destinations Grid Column In Descending Order Destination
Verify Get Destinations Grid Column Names By Order		Returns all the column names of Destinations grid in order.

Verify Drag Destinations Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Destinations grid. **Example**: Verify Drag Destinations Grid Column Destination Status
Verify Get All Rows of Specific Column From Dial Digits Grid	Column Name	Returns data of all the rows for given column name from Dial Digits grid. **Example**: Verify Get All Rows of Specific Column From Dial Digits Grid Destination
Verify Sort Dial Digits Grid Column In Ascending Order	Column Name	Sorts Dial Digits grid specific column in ascending order. **Example**: Verify Sort Dial Digits Grid Column In Ascending Order Destination
Verify Sort Dial Digits Grid Column In Descending Order	Column Name	Sorts Dial Digits grid specific column in descending order. **Example**: Verify Sort Dial Digits Grid Column In Descending Order Destination
Verify Get Dial Digits Grid Column Names By Order		Returns all the column names of Dial Digits grid in order.
Verify Drag Dial Digits Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Dial Digits grid. **Example**: Verify Drag Dial Digits Grid Column Destination Status
Verify Set Vendor Price List Detail Grid Settings	Grid Settings	Set Vendor Price List Detail grid settings from Grid Settings dropdown.

		Expected Behavior: Grid should be changed according to grid settings **Example**: Verify Set Vendor Price List Details Grid Settings Reset All
Verify Get All Rows of Specific Column From Vendor Price List Detail Grid	Column Name	Returns data of all the rows for given column name from Vendor Price List Detail grid. **Example**: Verify Get All Rows of Specific Column From Vendor Price List Detail Grid Destination
Verify Sort Vendor Price List Detail Grid Column In Ascending Order	Column Name	Sorts Vendor Price List Detail grid specific column in ascending order. **Example**: Verify Sort Vendor Price List Detail Grid Column In Ascending Order Destination
Verify Sort Vendor Price List Detail Grid Column In Descending Order	Column Name	Sorts Vendor Price List Detail grid specific column in descending order. **Example**: Verify Sort Vendor Price List Detail Grid Column In Descending Order Destination
Verify Get Vendor Price List Detail Grid Column Names By Order		Returns all the column names of Vendor Price List Detail grid in order.
Verify Drag Vendor Price List Detail Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Vendor Price List Detail grid. **Example**: Verify Drag Vendor Price List Detail Grid Column Destination Status
Verify Dial Digits Tab Renamed	Expected Tab Name	Checks if 'Dial Digits' tab is renamed according to expected tab name. Returns 'TRUE' if matched and 'FALSE' otherwise.

Verify Select Vendor Price List Detail Dial Digits Tab		Call this keyword to select 'Dial Digits' tab in Vendor Price List Detail screen. **Expected behavior**: Dial Digits tab should be selected.
Verify Select Vendor Price List Detail Reference Rates Tab		Call this keyword to select 'Reference Rates' tab in Vendor Price List Detail screen. **Expected behavior**: Reference Rates tab should be selected.
Verify Set Vendor Price List Detail Dial Digits Grid Settings	Grid Settings	Set Dial Digits grid settings in Vendor Price List Detail screen from Grid Settings dropdown. **Expected Behavior:** Grid should be changed according to grid settings **Example**: Verify Set Vendor Price List Detail Dial Digits Grid Settings Reset All
Verify Get All Rows of Specific Column From Vendor Price List Detail Dial Digits Grid	Column Name	Returns data of all the rows for given column name from Dial Digits grid in Vendor Price List Details screen. **Example**: Verify Get All Rows of Specific Column From Vendor Price List Detail Dial Digits Grid Destination
Verify Sort Vendor Price List Detail Dial Digits Grid Column In Ascending Order	Column Name	Sorts Dial Digits grid, in Vendor Price List Detail screen, specific column in ascending order. **Example**: Verify Sort Vendor Price List Detail Dial Digits Grid Column In Ascending Order Destination
Verify Sort Vendor Price List Detail Dial Digits Grid Column In Descending Order	Column Name	Sorts Dial Digits grid, in Vendor Price List Detail screen, specific column in descending order.

		Example:
		Verify Sort Vendor Price List Detail Dial Digits Grid Column In Descending Order Destination
Verify Get Vendor Price List Detail Dial Digits Grid Column Names By Order		Returns all the column names of Dial Digits grid, in Vendor Price Lists Details screen, in order.
Verify Drag Vendor Price List Detail Dial Digits Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Dial Digits grid in Vendor Price Lists Details screen. **Example**: Verify Drag Vendor Price List Detail Dial Digits Grid Column Destination Status
Verify Set Vendor Price List Detail Reference Rates Grid Settings	Grid Settings	Set Reference Rates grid settings in Vendor Price List Detail screen from Grid Settings dropdown. **Expected Behavior:** Grid should be changed according to grid settings **Example**: Verify Set Vendor Price List Detail Reference Rates Grid Settings Reset All
Verify Get All Rows of Specific Column From Vendor Price List Detail Reference Rates Grid	Column Name	Returns data of all the rows for given column name from Reference Rates grid in Vendor Price List Details screen. **Example**: Verify Get All Rows of Specific Column From Vendor Price List Detail Reference Rates Grid Destination
Verify Sort Vendor Price List Detail Reference Rates Grid Column In Ascending Order	Column Name	Sorts Reference Rates grid, in Vendor Price List Detail screen, specific column in ascending order. **Example**: Verify Sort Vendor Price List Detail Reference

		Rates Grid Column In Ascending Order Destination
Verify Sort Vendor Price List Detail Reference Rates Grid Column In Descending Order	Column Name	Sorts Reference Rates grid, in Vendor Price List Detail screen, specific column in descending order. **Example**: Verify Sort Vendor Price List Detail Reference Rates Grid Column In Descending Order Destination
Verify Get Vendor Price List Detail Reference Rates Grid Column Names By Order		Returns all the column names of Reference Rates grid, in Vendor Price Lists Details screen, in order.
Verify Drag Vendor Price List Detail Reference Rates Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Reference Rates grid in Vendor Price Lists Details screen. **Example**: Verify Drag Vendor Price List Detail Reference Rates Grid Column Destination Status
Verify Click Vendor Price List Detail Rates Grid Export To Excel Button		Call this keyword to click Rates grid 'Export to Excel' button in Vendor Price List Detail screen. **Expected behavior**: An excel file should be downloaded.
Verify Click Vendor Price List Detail Dial Digits Grid Export To Excel Button		Call this keyword to click Dial Digits grid 'Export to Excel' button in Vendor Price List Detail screen. **Expected behavior**: An excel file should be downloaded.
Verify Click Vendor Price List Detail Reference Rates Grid Export To Excel		Call this keyword to click Reference Rates grid 'Export to Excel' button in Vendor Price List Detail screen.

Button		**Expected behavior**: An excel file should be downloaded.
Verify Set Country Group Scope	Country Group Scope	Set country group scope in 'Country Group Scope' single selection dropdown.
Verify Set Country Groups Grid Settings	Grid Settings	Set Country Groups grid setting from Grid Settings dropdown. **Expected Behavior:** Grid should be changed according to grid settings **Example**: Verify Set Country Groups Grid Settings Reset All
Verify Get All Rows of Specific Column From Country Groups Grid	Column Name	Returns data of all the rows of given column name from Country Groups grid. **Example**: Verify Get All Rows of Specific Column From Country Groups Grid Country Group
Verify Sort Country Groups Grid Column In Ascending Order	Column Name	Sorts Country Groups grid specific column in ascending order. **Example**: Verify Sort Country Groups Grid Column In Ascending Order Country Group
Verify Sort Country Groups Grid Column In Descending Order	Column Name	Sorts Country Groups grid specific column in descending order. **Example**: Verify Sort Country Groups Grid Column In Descending Order Country Group
Verify Get Country Groups Grid Column Names By Order		Returns all the column names of Country Groups grid in order.

Verify Drag Country Groups Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Country Groups grid. **Example**: Verify Drag Country Groups Grid Column Country Group Countries
Verify Click Country Groups Grid Export To Excel Button		Call this keyword to click Country Groups grid 'Export to Excel' button. **Expected behavior**: An excel file should be downloaded.
Verify Click Re Analysis Link		Call this keyword to click 'Re-Analysis' link in Buy Dashboard screen. **Expected behavior**: Re analysis screen should be opened in a new tab.
Verify Set Re Analysis Grid Settings	Grid Settings	Set Re Analysis grid setting from Grid Settings dropdown. **Expected Behavior:** Grid should be changed according to grid settings **Example**: Verify Set Re Analysis Grid Settings Reset All
Verify Get All Rows of Specific Column From Re Analysis Grid	Column Name	Returns data of all the rows of given column name from Re Analysis grid. **Example**: Verify Get All Rows of Specific Column From Re Analysis Grid Country
Verify Sort Re Analysis Grid Column In Ascending Order	Column Name	Sorts Re Analysis grid specific column in ascending order. **Example**: Verify Sort Re Analysis Grid Column In Ascending Order Country

Verify Sort Re Analysis Grid Column In Descending Order	Column Name	Sorts Re Analysis grid specific column in descending order. **Example**: Verify Sort Re Analysis Grid Column In Descending Order Country
Verify Get Re Analysis Grid Column Names By Order		Returns all the column names of Re Analysis grid in order.
Verify Drag Re Analysis Grid Column	Source Column Name, Destination Column Name	Drags 'source column' to 'destination column' in Re Analysis grid. **Example**: Verify Drag Re Analysis Grid Column Country Status
Verify Click Re Analysis Grid Export To Excel Button		Call this keyword to click Re Analysis grid 'Export to Excel' button. **Expected behavior**: An excel file should be downloaded.
Verify Upload Failure Message	Message	Checks whether the upload failure message from the UI matches with expected failure message or not. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Click Failed Upload Info Icon		Call this keyword to click Jobs grid failed upload info icon. **Expected behavior**: Failed upload info should be opened in a new pop up.
Verify Failed Upload Info	Message	Checks whether the failed upload information from the Jobs grid matches with expected failure message or not. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Select View Price List Qos Tab		Call this keyword to select 'QoS' tab in Vendor Price List Details screen.

		Expected behavior: QoS tab should be selected.
Verify Compare Qos With Excel Data		Compares QoS grid values with the uploaded excel file data. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Mnp Column is Available		Checks if 'MNP' column is present in 'QoS' grid or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Comments Column is Available		Checks if 'Comments' column is present in 'QoS' grid or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Get All Rows of Rate Column From Vendor Price List Detail Grid	Column Name	Returns data of all the rows of 'Rate' column from Vendor Price List Detail grid. **Example**: Verify Get All Rows of Rate Column From Vendor Price List Detail Grid Rate
Verify Get All Rows of Rate Increase Violation Column From Vendor Price List Detail Grid	Column Name	Returns data of all the rows of 'Rate Increase Violation' column from Vendor Price List Detail grid. **Example**: Verify Get All Rows of Rate Column From Vendor Price List Detail Grid Rate Increase Violation
Verify Ascending Sorting Option Is Not Available In Destination Column	Column Name	Checks whether ascending sorting option is present in 'Destination' column in Vendor Price List Detail Rates grid. Returns 'TRUE' if absent and 'FALSE' otherwise.
Verify Descending Sorting Option Is Not Available In Destination Column	Column Name	Checks whether descending sorting option is present in 'Destination' column in Vendor Price List Detail Rates grid. Returns 'TRUE' if absent and 'FALSE' otherwise.

Verify IXTools Account Is Available	Account Name	Checks if given iXTools Account is present in 'iXTool Account' single selection dropdown. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify New Uploaded Vendor Price List Is Not Available In The Grid		Checks whether Uploaded Vendor Price List is present in Vendor Price Lists grid or not. Returns 'TRUE' if absent and 'FALSE' otherwise.
Verify Click Guarantee CLI Checkbox		Checks 'Guarantee CLI' checkbox.
Verify Click Exclude Rating Method From Price List Checkbox		Checks 'Exclude Rating Method' checkbox.
Verify Set Price List Content	Price List Content	Sets price list content in 'Price List Content' single selection dropdown.
Verify Set Country For Search	Create Country Name List (list)	Set countries in 'Country' multi selection dropdown for searching.
Verify Select Inline Action Item With Inline Item Name	Inline Item Name	Call this keyword to click on any inline action item. **Example**: Verify Select Inline Action Item With Inline Item Name Vendor Profile
Verify The Specific Tab On Vendor Profile Page Is Available	Tab Name	Checks if the expected tab is present in Vendor Profile page or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Specific Column On Vendor Profile Grid Is Available	Column Name	Checks if specific column is present in Vendor Profile grid or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Click Reference Rates Show Search Form Link		Checks if 'Show Search Form' link in Vendor Price List Detail Reference Rates screen is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.

Verify View Dropdown Is Visible		Checks if 'View' dropdown is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Status Dropdown Is Visible		Checks if 'Status' dropdown is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Discrepancy Dropdown Is Visible		Checks if 'Discrepancy' dropdown is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify In Routing Flags Dropdown Is Visible		Checks if 'In Routing Flags' dropdown is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Rate Textbox Is Visible		Checks if 'Rates' textbox is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Destination Textbox Is Visible		Checks if 'Destination' textbox is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Reference Rates Grid Accept Column Is Checkbox		Checks if 'Accept' column in Reference Rates grid is a checkbox or not. Returns 'TRUE' if it is checkbox and 'FALSE' otherwise.
Verify Click Re Analysis Grid First Row Inline Action Button		Call this keyword to click first row inline action button in Re Analysis grid. **Expected behavior**: Inline action items should be displayed.
Verify Number Plan Changes Grid Header Is Dialed Digits MCC MNC		Checks if Number Plan Changes grid header is Dialed Digit MCC MNC or not.
Verify Select Inline Action Item With Module Name	Inline Item Name	Call this keyword to click on inline action item for alternative locator. **Example**: Verify Select Inline Action Item With Module Name Vendor Profile

Verify The Country Selection Criteria Field Is Available In Re Analysis Page		Checks if 'Country' dropdown in Re Analysis screen is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Column Is Available In Re Analysis Page		Checks if 'Country' column in Re Analysis grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Selection Criteria Field Is Available In Vendor Profile Page		Checks if 'Country' dropdown in Vendor Profile screen is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Column Is Available In Vendor Profile Page		Checks if 'Country' column in Vendor Profile grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Selection Criteria Field Is Available In Vendor Profile Dialed Digits Page		Checks if 'Country' dropdown in Vendor Profile Dial Digits screen is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Column Is Available In Vendor Profile Dialed Digits Page		Checks if 'Country' column in Vendor Profile Dial Digits grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Selection Criteria Field Is Available In Vendor Profile Destinations Page		Checks if 'Country' dropdown in Vendor Profile Destination screen is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Column Is Available In Vendor Profile Destinations Page		Checks if 'Country' column in Vendor Profile Destination grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Click Search Rate Arrow Button		Call this keyword to click 'Search Rates' arrow button. **Expected behavior**: The search form should be expanded.

Verify The Country Selection Criteria Field Is Available In View Price List Details Rate Page		Checks if 'Country' dropdown in Vendor Price List Details screen is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Column Is Available In View Price List Details Rate Page		Checks if 'Country' column in Vendor Price List Details grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Click Search Dialed Digits Arrow Button		Call this keyword to click 'Search Dialed Digits' arrow button. **Expected behavior**: The search form should be expanded.
Verify The Country Selection Criteria Field Is Available In View Price List Details Dialed Digits Page		Checks if 'Country' dropdown in Vendor Price List Details Dial Digits screen is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Column Is Available In View Price List Details Dialed Digits Page		Checks if 'Country' column in Vendor Price List Details Dial Digits grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Click Search Ref Rates Arrow Button		Call this keyword to click 'Search Ref Rates' arrow button. **Expected behavior**: The search form should be expanded.
Verify The Country Selection Criteria Field Is Available In View Price List Details Ref Rates Page		Checks if 'Country' dropdown in Vendor Price List Details Reference Rates screen is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Column Is Available In View Price List Details Ref Rates Page		Checks if 'Country' column in Vendor Price List Details Reference Rates grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Select Reference Rates Tab		Call this keyword to select 'Reference Rates' tab

		Expected behavior: Reference Rates tab should be selected.
Verify The Country Selection Criteria Field Is Available In Compare Price List Pop Up		Checks if 'Country' dropdown in Compare Price List pop up is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify The Country Column Is Available In Compare Price List Pop Up		Checks if 'Country' column in Compare Price Lists grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Select Mcc Mnc Tab		Call this keyword to select 'MCC-MNC' tab **Expected behavior**: MCC-MNC tab should be selected.
Verify Click Search Mcc Mnc Arrow Button		Call this keyword to click 'Search MCC-MNC' arrow button. **Expected behavior**: The search form should be expanded.
Verify Status Filter Has All Status Item	Status Item List (list)	Verifies whether 'Status' multiple selection dropdown has all the statuses or not. **Example**: Verify Status Filter Has All Status Item @{STATUS LIST}
Verify Set Re Analysis Status	Status Item List (list)	Set status in 'Status' multiple selection dropdown in Re Analysis screen. **Example**: Verify Set Re Analysis Status @{STATUS LIST}
Verify Compare Vendor Price List Detail Rates Grid Destination		Compares Vendor Price List Details screen Rates grid 'Destination' with uploaded excel file data. Return 'TRUE' if matches and 'FALSE' otherwise.
Verify Compare Vendor Price List Detail Dial Digits Grid Destination		Compares Vendor Price List Details screen Dialed Digits grid 'Destination' with uploaded

		excel file data. Return 'TRUE' if matches and 'FALSE' otherwise.
Verify Compare Vendor Price List Detail Rates Grid Rate		Compares Vendor Price List Details screen Reference Rates grid 'Rate' with uploaded excel file data. Return 'TRUE' if matches and 'FALSE' otherwise.
Verify Get Reference Rates Tab Analyzed Rate		Returns Vendor Price List Details screen Reference Rates grid 'Analyzed Rate' column value.
Verify Get Reference Rates Tab Effective Date		Returns Vendor Price List Details screen Reference Rates grid 'Effective Date' column value.
Verify Target Buy Policies Tab Is Displayed		Checks if 'Target Buy Policies' tab is displayed or not. Returns 'TRUE' if displayed and 'FALSE' otherwise.
Verify Select Target Buy Policies Tab		Call this keyword to select 'Target Buy Policies' tab. **Expected behavior**: Target Buy Policies tab should be selected.
Verify Button Is Displayed	Button Name	Checks if a specific button is displayed or not. Returns 'TRUE' if displayed and 'FALSE' otherwise.
Verify Target Buy Policies Grid Column Is Present	Column Name	Checks if a specific column in Target Buy Policies grid is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Click Target Buy Policies Grid First Row Inline Action Button		Call this keyword to click first row inline action button in Target Buy Policies grid. **Expected behavior**: Inline action items should be displayed.
Verify Inline Action Item Is Present	Item Name	Checks if a specific inline item is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.

Verify Click Create New Target Buy Policy Button		Call this keyword to click 'Create New Target Buy Policy' button. **Expected behavior**: New Target Buy Policy pop up should be opened.
Verify Set Target Buy Policy Name	Prefix	Sets Target Buy Policy name in 'Target Buy Policy' textbox. Adds random string along with the prefix then sets the final value in the textbox. **Example**: Verify Set Target Buy Policy Name UAT_AUTO
Verify Get Created Target Buy Policy		Returns created Target Buy Policy name.
Verify Set Target Buy Policy Abbreviation	Prefix	Sets Target Buy Policy abbreviation in 'Abbreviation' textbox. Adds random string along with the prefix then sets the final value in the textbox. **Example**: Verify Set Target Buy Policy Abbreviation UAT_AUTO
Verify Set Route Class to Create New Target Buy Policy	Route Class	Sets route class in 'Route Class' single selection dropdown. **Example**: Verify Set Route Class to Create New Target Buy Policy Standard
Verify Click Include CLI Checkbox		Checks 'Include CLI' checkbox
Verify Click Automate Generation Checkbox		Checks 'Automate Generation' checkbox
Verify Click Save Target Buy Policy Button		Call this keyword to click 'Save Target Buy Policy' button. **Expected behavior**: New Target Buy Policy should be saved.

Verify Click Target Buy Overrides Button		Call this keyword to click 'Target Buy Overrides' button. **Expected behavior**: Target buy override screen should be opened in new tab.
Verify Target Buy List Overrides Screen Is Loaded		Checks if 'Target Buy List Overrides' screen is loaded properly. Returns 'TRUE' if loaded properly and 'FALSE' otherwise.
Verify Destination Input Textbox Is Visible		Checks if 'Destination' input box is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Expected Grid Column Is Present	Column Name	Checks if expected column is present or not. Returns 'TRUE' if present and 'FALSE' otherwise. **Example**: Verify Expected Grid Column Is Present Vendor
Verify Expected Dropdown List Control Present in Target Buy Overrides Screen	Drop Down	Checks if expected dropdown list control is present in Target Buy Override Screen or not. Returns 'TRUE' if present and 'FALSE' otherwise. **Example**: Verify Expected Dropdown List Control Present in Target Buy Overrides Screen Status
Verify Select Multiple Rows of Target Buy List Overrides Grid		Call this keyword to select first couple of rows in Target Buy overrides grid.
Verify Click Target Buy List Overrides Bulk Edit Button		Call this keyword to click 'Bulk Edit' button in Target Buy Overrides screen. **Expected behavior**: Target buy override screen Bulk Edit should be opened in a pop up.
Verify Set Bulk Edit End Date	End Date, Future Date	Sets end date in 'End Date' date picker input box of bulk edit pop up. If Future Date is set to true, sets a future date programmatically.

		Example: Verify Set Bulk Edit End Date 1/1/2018 ${FALSE}
Verify Click Bulk Edit Submit Button		Call this keyword to click 'Submit' button in Bulk Edit pop up. **Expected behavior**: Bulk edit changes should be saved.
Verify Click Buy And Sell Deal Management Link		Call this keyword to click 'Buy And Sell Deal Management' link in Buy Dashboard screen. **Expected behavior**: Buy and Sell deal management screen should be opened in a new pop up.
Verify Click Request New Buy And Sell Deal		Call this keyword to click 'Request New Buy And Sell Deal' button. **Expected behavior**: Request new buy and sell deal screen should be opened in a pop up.
Verify Buy and Sell Deal Details Screen Status Dropdown is Visible		Checks if 'Status' dropdown is visible in Buy and Sell Deal details screen or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify End Date Text Box is Visible		Checks if 'End Date' textbox is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Auto Expire CheckBox is Visible		Checks if 'Auto Expire' checkbox is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Column Name Proposed Deal Summary Table	Column Name	Checks if specific column in Proposed Deal Summary Table is visible or not. Returns 'TRUE' if visible and 'FALSE' otherwise.
Verify Target Buy Details Section Is Present In Vendor Profile Page		Checks if 'Target Buy Details' section is present in Vendor Profile page or not. Returns 'TRUE' if present and 'FALSE' otherwise.

Verify The Specific Field On Target Buy Details Section Is Available	Field Name	Checks if any specific field in 'Target Buy Details' section is present or not. Returns 'TRUE' if present and 'FALSE' otherwise.
Verify Set Target Buy Distribution Link Code		Sets target buy distribution link code in 'Target Buy Distribution Link Code' textbox. A random code is generated and set to the textbox.
Verify Set Target Buy Distribution Receiving Member	Member Name Prefix	Sets target buy policy distribution receiving member in 'Target Buy Policy Distribution Receiving Member' textbox. Adds random string along with the prefix then sets the final value in the textbox. **Example**: Verify Set Target Buy Distribution Receiving Member UAT_AUTO
Verify Set Target Buy List	Item Name, Is First Item	Sets target buy list in 'Target Buy List' single selection dropdown. Selects the first item from the dropdown if 'Is First Item' is set to 'True'.
Verify Set Target Buy List Number Plan	Item Name, Is First Item	Sets target buy list number plan in 'Target Buy List Number Plan' single selection dropdown. Selects the first item from the dropdown if 'Is First Item' is set to 'True'.
Verify Click Buy And Sell Deal Save Button		Call this keyword to click 'Save' button in Buy and Sell deal screen. **Expected behavior**: Buy and sell deal should be saved.
Verify Target Buy Policy Grid Row Details	Status, Type, Call Type, Route Class	Verifies whether Target Buy Policy grid details matches with the expected data or not. Returns 'TRUE' if matches and 'FALSE' otherwise.
Verify Click Target Buy Policy Grid First Row Inline Action Button		Call this keyword to click first row inline action button in Target Buy Policies grid.

		Expected behavior: Inline action items should be displayed.
Verify Click Edit Target Buy Policy Button		Call this keyword to click 'Edit Target Buy Policy' button in View Target Buy Policy screen. Expected behavior: Editable fields should be visible in View Target Buy Policy screen.
Verify Click Cancel Edited Target Buy Policy Button		Call this keyword to click 'Cancel' button in View Target Buy Policy screen. Expected behavior: Edited fields should be reverted to default.
Verify Click Save Edited Target Buy Policy Button		Call this keyword to click 'Save Target Buy Policy' button in View Target Buy Policy screen. Expected behavior: Changes should be saved.
Verify Set Target Buy Policy Type	Type	Sets target buy policy type in 'Target Buy List Type' single selection dropdown. Example: Verify Set Target Buy Policy Type Formula
Verify Refresh Buy Window		Refreshes Buy window and takes back to Buy Dashboard screen.
